

Visual and Tactile Guidance Systems for Entrance Areas

In public buildings in particular, visual guidance and orientation systems in entrance areas are essential. For visually impaired persons, however, additional tactile systems are necessary for orientation. We have developed a safety concept using floor indicators to allow visually impaired persons to find their way inside the building.

Customized, accessible solutions on the basis of Top Clean aluminium profile mats with integrated guidance strips are available. We apply profile inlays with various structures and colours to facilitate orientation. Contrasting installation patterns support the guidance concept. The tactile orientation aids can be easily identified with a white cane. The system addresses various human senses, providing increased safety.

Compatible with any Profile

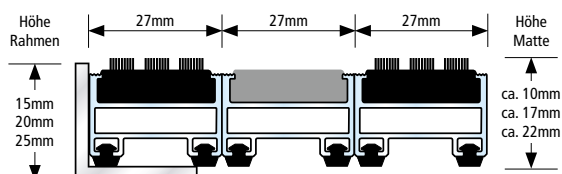

The design of our guidance system, according to DIN 18040-1 for accessible development, may be adapted individually to architectural concepts. The system is compatible with any profile in the comprehensive Top Clean programme by us. A range of variants with ribbed carpet, scraper bars and brush cassettes is available in numerous colours and various profile heights. In addition, we provide powder-coated aluminium profiles in RAL colours.

Tailor-Made Solutions for Inside and Outside Zones

The Top Clean programme comprises solutions for inside and outside zones with normal and heavy pedestrian traffic – tailor-made and in any size. Special shapes with gaps, diagonal or circular cutting are available upon your request. Continuous, sound-absorbing rubber profiles on the underside prevent footfall noise effectively.

Tactile Guidance System Top Clean TREND®

-  Tactile/visual guidance system
-  Accessible
-  For use indoors or in covered outdoor areas
-  Outdoor area
-  Recyclable
-  Rust-proof

All profiles feature highly effective impact sound insulation!

Visual and tactile guidance systems integrated into the mats assist blind persons and people with impaired vision to find their way inside the building. The guidance system is available in any width and may be used with any profile. Combining various profiles is possible. All colours for ribbed carpet and cassette brushes are available when using a tactile guidance system.
